Jacob pendant alabaster  
product manual

### A、 Precautions

Note: before installation, make sure that the power supply has been disconnected, and be careful of electric shock!

- 1 . Carefully open the package and place the parts.
  - 2 . According to the requirements of watt mark on the lamp head, install a bulb (not included) with the maximum wattage, and finally turn on the power switch.
  - 3 . If the wire of the lamp is damaged, the wire shall be replaced by the manufacturer's service agent or qualified person to avoid danger.
  - 4 . This lamp can only be used in non humid room with a maximum rated temperature of 30 °C.
  - 5 . The minimum distance between the light source and the object is 0.8m.
- 6 .Cleaning of lamps (please disconnect the power supply)
- 1). Please use a soft cloth to wipe the dust on the lamp body.
  - 2). Please use neutral solvent to clean the glass and do not use abrasive paper and wire brush to clean the lamp.

### B、 Installation procedure
