

A、Precautions

Attention: Before installation, make sure the power supply is disconnected and be careful of electric shock!

1. Be careful to open the packaging and place the components properly.
2. Install light bulbs that do not exceed the maximum wattage specified on the lamp head (excluding), and finally turn on the power switch.
3. If the wires of the lighting fixture are damaged, they must be replaced by the manufacturer's service agent to avoid danger.
4. This lamp is only suitable for use in non humid indoor environments with a maximum rated temperature of 30 °C.
5. The minimum distance between the light source and the illuminated object is 0.8m.
6. Cleaning of lighting fixtures (please disconnect the power)
 - 1) Please use a soft cloth to wipe the dust off the lamp body.
 - 2) Please clean the glass with a neutral solvent and let it dry. It is strictly prohibited to use sandpaper or wire brushes for cleaning.

B、Installation Steps

1. Cut off the power and wear gloves before assembling the lighting fixtures
 2. Fix the hanging plate (2) and aluminum component (3) to the ceiling with self tapping screws (1)
 3. Connect the lamp body wires to the external wires using terminal block (4), where L represents the live wire, N represents the neutral wire, and the ground wire represents the ground wire
 4. Fix the aluminum tube (5) onto the hanging plate (2)
 5. Fix the aluminum component (6) onto the aluminum component (3)
